Spot Satellite Messenger Coverage Expanded Into Southeast Asia and the Surrounding Maritime Region

New Singapore Gateway Expands Affordable and Reliable GPS Satellite Communication and Tracking

MILPITAS, CA (October 13, 2008) – SPOT LLC (www.findmespot.com), a subsidiary of Globalstar, Inc (NASDAQ:GSAT) and the pioneer behind the award-winning SPOT Satellite MessengerTM, today announced it has expanded SPOT's satellite communications coverage throughout Singapore, Malaysia, and significant portions of Indonesia, and much of the surrounding maritime region including the Strait of Malacca. The expanded coverage is due to the newly completed gateway or ground station located in Singapore which is now operational.

With this expansion, current SPOT users can now enjoy seamless coverage from Eastern India throughout significant portions of Southeast Asia, and south to Australia and New Zealand. Distribution of the SPOT Satellite Messenger is expected to begin in Singapore and Southeast Asia later this year.

"Today's announcement demonstrates our continued commitment towards offering expanded affordable and reliable satellite communications around the world for SPOT Satellite Messenger customers," said Darren Bassel, Director of Marketing for SPOT LLC. "The gateway completion increases satellite communication coverage for maritime and commercial tracking applications as well as outdoor enthusiasts and business travelers who want a line of communication for connectivity and safety independent of cellular coverage."

SPOT, the world's first satellite messenger enables users to send their GPS location and status update message to friends, family, co-workers or an emergency response center, Independent of cellular coverage. SPOT works nearly around the world including all of the continental United States, Canada, Mexico, Europe and Australia, portions of South America, Northern Africa and Northeastern and Southeast Asia, and hundreds or thousands of miles off-shore of these areas.
