Because we love Brian Brawdy (He lives a nomadic lifestyle and has all of these cool tech toys!) we thought we'd give you an update on his tour and give you some great words of advice for the New Year. First for the advice:

"Get off the couch and out of your box. Get moving and live your life, not the lives of others on the electronic box [TV]. Be your own hero. Be your own guru. Take your own confession. Find adventure where you find yourself. Remember, adventure needn't be extreme, it just needs to be yours!" --Brian Brawdy

Often referred to as "an Environmental Pioneer", "Outdoor Adventure Expert" and "Green RVer", Brian recently completed his Wonder Explore Believe Tour in his decked-out "Green" RV that took him to 48 states in 10 months. His passion and goal on the journey was to inspire individuals to take a proactive roll in their lives and the planet.

SPOT is one of Brian's selected survival gear pieces that he always keeps at hand. Click to see how Brian and the Green RV are Covered On and Off Road with SPOT Satellite GPS Messenger in one of his recent blog entries discussing SPOT Roadside Assistance: The world's only roadside assistance that operates solely via satellite. *Photo: Brian walking across Death Valley*

During the 2009 Conservation through Exploration Tour, Brian will investigate some of North America's most threatened and endangered ecosystems and reporting on the gear needed to do so. We feel it's a worthy tour to show how critical everyone's involvement in the future of our planet is. Stay tuned for continued updates including Brian's use of the SPOT Satellite messenger during his 2009 tour at http://wonderexplorebelieve.net/2009-tour/ .
