**SPOT X APP AT A GLANCE**

**CONNECT THE APP WITH YOUR MOBILE DEVICE**

1. Install the **SPOT X App** from your mobile device app store.

2. Enable Bluetooth on your mobile device (Spot X’s Bluetooth is always discoverable).

3. Place the SPOT X and the mobile device within 10 feet (3 meters) of each other.

4. Open the SPOT X App.

5. Login using your SPOT My Account username & password.

6. Select your SPOT X (ex: **SXB2970000**).
**IMPORTANT SPOT X TIPS**

- SPOT X needs a clear view of the sky with no obstructions (buildings, roof overhangs, trees, etc.) to obtain a GPS signal to provide the most accurate location information and send messages. SPOT X may not function properly at the bottom of a deep canyon, in a cave, or in very dense woods.

- Orienting SPOT X vertically with the **antenna facing towards the sky** will improve performance as the antenna is located on the top portion of the device.

- Since SPOT X has the ability to receive messages, messages sent from the device can be acknowledged shortening the transmission time.

- Before heading off the grid, we strongly recommend that you send a test message to ensure your device was activated properly. You can view your sent messages in your account at [FindMeSPOT.com/MyAccount](http://FindMeSPOT.com/MyAccount).

**NOTE:** If no GPS signal is found the **GPS** will display on the screen. If possible, you should move to a location with a clearer view of the sky. You can check the status of your messages in the message thread.

**SPOT X OPERATING TEMPERATURES**

Prolonged use or storage of your SPOT X in direct sunlight or in a vehicle may cause the device to overheat and/or damage its battery. SPOT X can withstand operating in temperatures of -4F to +140F (-20C to +60C).
CONTACTS

SPOT X can hold up to 70 contacts and/or contact groups. Contacts can be manually added through the SPOT X or through SPOT MY ACCOUNT. If added through SPOT MY ACCOUNT, syncing is required using the SPOT X Firmware Updater in order for the contacts to display on the SPOT X.
