SPOT Introduces New SPOT X® Device with Enhanced Features and Performance
Bluetooth® wireless technology enables versatility and a new user experience with SPOT X® App

COVINGTON, La. (September 9, 2019) – SPOT LLC, a wholly owned subsidiary of Globalstar, Inc., (NYSE American: GSAT) and a leader in satellite communications and technologies, introduces a new **SPOT X®** two-way satellite messenger. Users now have the flexibility to use the new SPOT X® device to connect SPOT X to your smartphone via *Bluetooth®* wireless technology through the SPOT X app to send and receive satellite messages.

When you're off the grid or have unreliable cellular coverage, SPOT X provides satellite communications and emergency notification technology to the avid adventurer or the remote worker as the world's only two-way satellite messenger with full QWERTY keyboard. SPOT X has its own dedicated U.S. mobile number, so others can conveniently message you directly at any time. With unlimited use of 14 pre-programmed messages and the ability to access your contacts in the App, you can communicate easily with family, friends, coworkers or directly with Search & Rescue services in a life-threatening situation.

"The vast majority of our current customers are already taking their cell phones into the backcountry," said David Kagan, CEO at Globalstar. "Adding *Bluetooth®* capability to SPOT X® allows users to seamlessly connect their smartphone and use an intuitive interface to send and receive messages via the Globalstar Satellite Network. SPOT X® continues to work solely for up to 10 days on a single charge, with or without a paired phone. "

The new and improved SPOT X® with *Bluetooth® wireless technology* and new SPOT X app is the latest addition to the award-winning SPOT family of products, providing affordable, two-way messaging, tracking and S.O.S in emergencies for hundreds of thousands of users all over the world. Through a direct connection to the GEOS International Emergency Coordination Center, SPOT has initiated more than 6,600 rescues around the globe within the last ten years.

SPOT X® is available online and at outdoor retailers at \$249.99 USD with both month-to-month Flex plans and annual service plans starting at \$11.99 USD per month. The *Bluetooth®* feature enables satellite device functionality using an iOS and Android compatible SPOT X App and is available for download today.
